

Social Mixer event

Environmental Humanities

Before the craziness of term, come grab a coffee to discover the term card and meet other post-graduate & early career researchers working across the environmental humanities – with pastries, of course!

It is a perfect time to meet potential colleagues from across the university. The EH spans across all departments – all are welcome!

Members of the steering committee will be here to discuss your research interests. You can suggest events, working groups or presentations of your work, anything ranging from eco-criticism to environmental anthropology.
